

Fun Photo Sharing

Saturday May 28, 1:30-4:30 p.m. (3 hr)

Instructor: Eleanor Salmon

Do you like to take pictures and to share them with friends and family? ***Do you have an Apple iPhone or iPad?*** Would you like to learn to use apps to help you share your pictures in fun and interesting ways in email or to post to Instagram, Facebook or Twitter? Then this is the workshop for you!

You will need to have approximately a \$10.00 credit on your iTunes account to purchase apps.

You'll also want to come to this workshop with pictures you have previously taken already on your device and in your Photos app. Please come with the following types of photos: a colorful landscape, a portrait, two pictures displaying two aspects of the same event, a picture with a background element you don't like, several pictures of family or friends, and a few vacation photos.

If you don't yet have one of the main social media/sharing apps loaded to your Apple device, you are encouraged to come with one pre-loaded and set up. For those of you who are interested in blogging using Wordpress, please download the app and set up a free basic account; time permitting you will be shown how to post you photo app creations to enhance your blog posts.

Kit Fee: See Requirements above

Skill Level: introductory

Class size limited to 10
